Agenda

- 4 more slides
- 20 minute live demo
- 25 minute Q&A

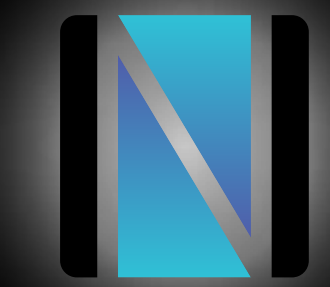

Offerings

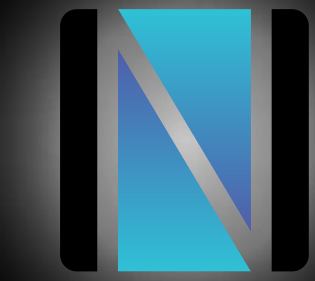

- Free training series
- Paid classes \$99
- Mentoring & Coaching

calendly.com/mattnav

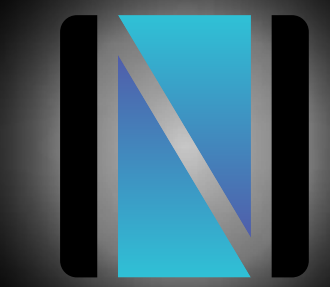

What is JSON?

- Structured text
 - Supports hierarchy
- Easy to read
 - But every { . , } must be in its place
- Native to FileMaker
 - New features in FM 2024
- The language of APIs and connections outside FM sandbox

Why JSON?

- It's flexible
- It will make your development life MUCH easier
- It will make your databases cleaner
- It will make you feel smarter

Where JSON?

- Passing multiple parameters – obvious first use
- API & Claris Connect
- Logging (like fmLog)
- Store all session preferences in a Global Text field with JSON
- JSON field in every table (I'll explain later)
- Power dashboards

It's demo time
